SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Dear Sir:

Transmitted herewith is an Information Disclosure Statement with respect to the above-referenced application.

Applicant submit herewith patents, publications and/or other information of which he is aware, which he believes may be material to the examination of this application and in respect of which there may be a duty to disclose.

The filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made, an admission that the information cited is, or is considered to be, material to patentability or that no other material information exists.

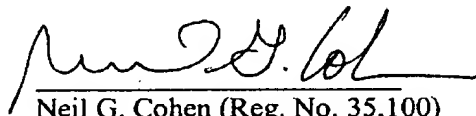

The filing of this Information Disclosure Statement shall not be construed as an admission against interest in any manner.

Form SB0008B along with legible copies of all items listed in the Form accompany this information statement.

Applicant refers the Examiner to the attached statement concerning the cited references.

Dated: January 30, 2004

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Neil G. Cohen", written over a horizontal line.

STATEMENT REGARDING CITED REFERENCES

JAMES SENG, iDNS, International DNS, Presentation, January 5, 1999, introduces the concept of a server-based solution for international domain names (IDN). A user points his/her machine to a special IDN server (iDNS), which transforms an IDN into a compliant format. If the user's machine is not pointed to the special IDN server, a traditional DNS server will receive an IDN and will not be able to resolve the same. This is illustrated by the diagram on page 10 of the Seng presentation, which indicates that 'OP Users' will not resolve. The concept of Seng would require that root servers, name servers, and intermediate machines be modified.

M. DUERST, "Internationalization of Domain Names," Internet Draft, December 1996 is an earlier version of the 1997 and 1998 Duerst references already of record. Duerst discloses the introduction of a new zero level domain (ZLD) – parallel to the "dot" root -- under which transformed international domain names would reside. As such, Duerst requires that any domain name registry has to register and manage syntactically parallel transformed international domain names below the new ZLD. Thus, root domain servers would have to be changed worldwide to implement Duerst.

PTO/SB/08B (08-03)

Approved for use through 07/31/2006. OMB 0651-0031

U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE

Under the Paperwork Reduction Act of 1995, no person shall be required to respond to a collection of information unless it contains a valid OMB control number.
